Description:

GATOR FABRIC GF5 WOVEN (200 Lbf) is a woven geotextile made up polypropylene strips. These strips are woven to form a stable and durable network such that strips retain their relative position. It provides separation for good subgrades by preventing mixing of subgrade soils. A woven geotextile can achieve higher tensile strength at low elongation, known as high modulus.

Features:

- UV-Resistance
- Inert to soil chemicals (Alkalies, Acids)
- Inert to biological degradation
- Meets AASHTO M288 Class 3

Benefits:

- Improves long-term performance of almost any hardscape project
- Extra-resistant to punctures and tears
- Reduces extra excavation and backfill
- Cost-effective solutions for reinforcement applications
- Easy to install on worksites

Uses:

- Soil stabilization
- Soil separation
- Can be applied for driveways, pathways, sidewalks and retaining walls—footing only (toe wall section)
- Can also be used for ground cover

Roll sizes:

- 4' X 100'
- 6.25' X 100'
- 6.25' X 300'
- 12.5' X 432'
