NOTES

See page 6 for icons description.

See page 27 for more information about applications.

See page 34 to 36 for more technical information.

Every unit is calibrated to ensure height is within a 1 mm tolerance.

*The Terrazzo Collection comes with a factory-applied, water-based "natural look" protectant that enhances the surface and aids in maintenance. However, to maintain its de-icing salt resistant properties, it is essential to re-apply a concrete or natural stone water-based protectant or sealer periodically.

We recommend applying the protectant as soon as you observe water absorption. If water is still repelled, re-application is not yet necessary. Always test the

protectant or sealer on a small, hidden area before full application.

Please note that for barefoot walking areas (e.g. pool deck) dark-colored paving units could get very hot under the sun.
