The only paver that checks all the boxes.

TECHO—BLOC
What makes a quality paving stone?

☑️ Superior Strength

This patent pending process makes HD² products up to 1.5 times stronger than industry standard of 8000 psi. What’s more, these paving stones are packed with ingredients earning them a spot at the top of the Mohs hardness scale. Its resistance to flexion and compression ensures no crumbling.

☑️ Durability

HD² is like anti-aging for paving stones. Its higher particles per square inch dramatically decreases the stone’s absorption levels, and a stone that retains less water is less vulnerable to the elements.

That means freeze-thaw and acid rain won’t affect or degrade HD² paving stone’s integrity.
Vibrant Color

With dazzling color distribution, vibrancy, higher pigment content and subtle hues, the HD² patent pending process ensures rich, authentic color blends.

What's more, HD² has thermodynamically stabilized pigments that ensure resistance to UV rays, chemicals and extreme temperatures. Head turning colors whose vibrancy stands the test of time!

Ultra-detailed Texture

Look closely, move in and admire that hyper-smooth finish. HD² is always close-up ready. Boasting higher particles per square inch, this technology leads to a tighter surface with less pores. HD² translates into finishes that are always ultra-detailed and refined for the smoothest smooth and intricate textures that you can feel with your eyes.

And now... HD²+

Extra-Protection

Taking our already cutting-edge technology to the next level. HD²+ has the added benefit of a factory seal for added stain resistance, elevated color boost and a reduced absorption rate.
